

DataViz Pro - Feature Demo & Walkthrough

Overview

DataViz Pro is a **completely free, professional data visualization platform** that empowers users to transform raw data into actionable insights through AI-powered analysis, advanced visualizations, and real-time collaboration.

Core Features Demo

1. AI-Powered Data Analysis Dashboard

What it does:

- Upload CSV/Excel datasets
- Automatic data quality analysis
- AI-generated insights and recommendations
- Instant metric calculations

Key Metrics Calculated:

- **Total Charts** - Number of visualizations created
- **Data Points** - Total records in dataset
- **Data Completeness** - Percentage of non-null values
- **Unique Records** - Count of distinct rows
- **Duplicate Records** - Count of duplicate entries
- **Missing Values** - Count of null/empty cells

Demo Workflow:

1. Upload sales_data.csv (500 rows)
 - ↓
2. AI analyzes and displays:
 - Total Charts: 8
 - Data Points: 500
 - Data Completeness: 94.2%
 - Unique Records: 487
 - Duplicate Records: 13
 - Missing Values: 156
 - ↓
3. AI generates insights:
 - "Sales trending upward 23% this quarter"
 - "Q4 shows seasonal spike pattern"
 - "Top 3 regions account for 67% of revenue"

2. Advanced Chart Types

Available Visualizations:

Chart Type	Use Case	Example
Heatmap 🔥	Density visualization, correlation matrices	Website heatmap of user clicks
Sankey Diagram 🌊	Flow and relationships	Customer journey from awareness to purchase
Sunburst Chart ☀️	Hierarchical data	Company org structure by department
Treemap 📦	Hierarchical nested rectangles	Budget allocation by category
3D Scatter Plot 🎯	Three-dimensional relationships	Sales vs Marketing vs Product performance
Geographic Map 🌐	Location-based data	Global sales by country
Gantt Chart 📅	Project timelines	Project milestones and deadlines
Waterfall Chart 💧	Cumulative effects	Revenue breakdown: Sales - Costs = Profit

Demo Example - Sales Analysis:

Dataset: Q4 Sales by Region

↓

Chart 1: Bar Chart - Total Sales by Region

Chart 2: Sankey - Customer Journey (Awareness → Purchase)

Chart 3: Heatmap - Sales by Region × Product Category

Chart 4: Waterfall - Revenue Breakdown

Chart 5: Gantt - Sales Campaign Timeline

3. Export & Sharing

Export Formats:

-  **PDF** - Professional reports with all metrics
-  **PowerPoint (PPT)** - 3-column grid layout with charts and names
-  **PNG** - Individual chart images

Export Options:

- Choose which metrics to include
- All metrics selected by default
- Customize export layout
- Add branding/watermarks

Demo Export:

Export Dashboard as PPT

├ Slide 1: Title & Summary

├ Slide 2: 3 Charts (Heatmap, Sankey, Waterfall)

├ Slide 3: 3 Charts (Bar, Line, Scatter)

├ Slide 4: Key Metrics & Insights

└ Slide 5: Recommendations

4. Real-Time Notifications

Notification Types:

Type	Trigger	Example
Export Success 	PDF/PPT export completes	"Your dashboard exported successfully!"
Export Error 	Export fails	"Export failed: Dataset too large"
Data Upload 	Dataset uploaded	"sales_data.csv uploaded (500 rows)"
Analysis Complete 	AI analysis finishes	"Analysis complete: 8 insights found"
System Alert 	Important updates	"New features available!"

Notification Features:

- Toast notifications (auto-dismiss)
- Notification center with history
- Sound alerts (customizable)
- Connection status indicator
- Unread badge counter

Demo Workflow:

```
User Action → Notification Triggered
├─ Upload dataset → "Dataset uploaded (500 rows)"
├─ Generate charts → "Analysis complete: 8 insights found"
├─ Export PDF → "PDF exported successfully!"
└─ Export PPT → "PowerPoint created (5 slides)"
```

5. Team Workspaces & Collaboration

Workspace Roles:

Role	Permissions	Use Case
Admin 👑	Full access, manage members	Team lead, manager
Editor ✎	Create, edit, delete dashboards	Analyst, data scientist
Viewer 👁	View-only access	Executive, stakeholder

Collaboration Features:

- Real-time presence indicators
- Live cursor tracking
- Conflict resolution for concurrent edits
- Activity log of all changes
- Version history

Demo Workspace:

```

Sales Team Workspace
├─ Members:
│   ├─ Alice (Admin) - Team Lead
│   ├─ Bob (Editor) - Data Analyst
│   ├─ Carol (Editor) - Business Analyst
│   └─ David (Viewer) - Executive
├─ Dashboards:
│   ├─ Q4 Sales Report
│   ├─ Regional Performance
│   └─ Customer Metrics
└─ Real-time Activity:
    ├─ Alice editing Q4 Sales Report
    ├─ Bob viewing Regional Performance
    └─ Carol added new chart

```

6. Automated Insights Engine

Insight Types:

Type	Detection Method	Example
Anomalies ⚠️	Statistical (Z-score)	"Unusual spike in sales on 2026-03-29"
Trends 📈	Time series analysis	"Sales trending upward 23% this quarter"
Correlations 🔗	Pearson correlation	"Marketing spend strongly correlates with sales"
Outliers 🎯	IQR method	"Region X is an outlier performer"
Patterns 🔍	Frequency analysis	"80% of sales occur on weekends"
Forecasts 🌐	Trend projection	"Expected 35% growth next quarter"

Confidence Levels:

- **Very High** (80-100%) - Highly reliable
- **High** (60-80%) - Reliable
- **Medium** (40-60%) - Moderate confidence
- **Low** (<40%) - Use with caution

Demo Insights:

Sales Dataset Analysis

└─ **Anomaly:** "Unusual spike on March 15 (3.2σ deviation)"

| **Confidence:** Very High | **Severity:** High

| **Recommendation:** Investigate cause of spike

|

└─ **Trend:** "Upward trend detected (23% increase)"

| **Confidence:** High | **Period:** Monthly

| **Recommendation:** Continue current strategy

|

└─ **Correlation:** "Strong correlation between ads and sales (0.87)"

| **Confidence:** Very High

| **Recommendation:** Increase ad spending

|

└─ **Pattern:** "80% of sales occur on weekends"

| **Confidence:** High

| **Recommendation:** Focus weekend promotions

7. Template Gallery

Pre-Built Templates:

Template	Industry	Use Case
Sales Dashboard 	Retail/SaaS	Track revenue, deals, pipeline
HR Analytics 	Human Resources	Employee metrics, turnover, engagement
Financial Report 	Finance	P&L, cash flow, budget vs actual
Marketing Analytics 	Marketing	Campaign performance, ROI, channels

Template Features:

- Pre-configured charts
- Sample data included
- Customizable metrics
- One-click application

Demo Template Usage:

1. Select "Sales Dashboard" template
2. Upload your sales data
3. Charts auto-populate with your data
4. Customize colors and metrics
5. Export or share with team

8. Data Transformation Tools

Available Transformations:

Tool	Purpose	Example
Pivot Table	Reshape data	Convert rows to columns
Formulas	Calculated columns	Revenue = Price × Quantity
Filtering	Data selection	Show only Q4 sales
Sorting	Data ordering	Sort by revenue descending
Aggregation	Data summarization	Sum, average, count by category

Demo Transformation:

```

Original Data:
Date | Region | Product | Sales
2026-01-01 | North | A | 1000
2026-01-01 | South | B | 1500

Pivot Table:
Region | Product A | Product B | Total
North | 1000 | 0 | 1000
South | 0 | 1500 | 1500

Calculated Column:
Revenue_per_Unit = Sales / Quantity

```

9. Theme & Branding Customization

Customization Options:

Element	Options	Example
Color Palette	10+ presets	Dark, Light, Ocean, Forest
Typography	Font selection	Roboto, Inter, Playfair
Logo	Upload custom	Company logo in header
Watermark	Text/image	“Confidential - Internal Use”
Accent Color	Full spectrum	Blue, Red, Green, Purple

Demo Branding:

```
Theme: Corporate Dark
├─ Primary Color: #1E3A8A (Deep Blue)
├─ Accent Color: #F59E0B (Amber)
├─ Font: Inter
├─ Logo: company_logo.png
└─ Watermark: "© 2026 DataViz Pro"
```

10. Public Dashboard Sharing

Sharing Features:

- Generate public link
- View-only access
- No login required
- Expiration dates
- Password protection (optional)

Demo Sharing:

```
Dashboard: Q4 Sales Report
├─ Public Link: https://vizpro.org/share/abc123xyz
├─ Access: View-only
├─ Expires: 2026-04-30
├─ Password: None
└─ Views: 247 | Last viewed: 2 hours ago
```

Complete User Journey

Scenario: Marketing Team Q4 Analysis

Step 1: Upload Data

Upload: q4_marketing_data.csv (1,200 rows)

↓

AI Analysis:

- Data Points: 1,200
- Completeness: 96.8%
- Duplicates: 5
- Missing Values: 38

Step 2: Generate Visualizations

Create Charts:

1. Campaign Performance (Bar Chart)
2. ROI by Channel (Pie Chart)
3. Spend vs Revenue (Scatter Plot)
4. Timeline (Gantt Chart)
5. Regional Heatmap

Step 3: Get Automated Insights

Insights Generated:

- ✓ "Email campaigns show 45% higher ROI"
- ✓ "Social media spend trending upward 28%"
- ✓ "Unusual spike in conversions on Black Friday"
- ✓ "Strong correlation between ad spend and sales"

Step 4: Customize & Export

Export Options:

- Format: PowerPoint
- Metrics: All selected
- Theme: Corporate Blue
- Include: Insights & Recommendations

Step 5: Share with Team

Share Dashboard:

- Workspace: Marketing Team
- Members: 5 editors, 3 viewers
- Real-time collaboration enabled
- Activity log tracking all changes

Key Differentiators

Feature	DataViz Pro	Competitors
Price	 Completely Free	Paid subscriptions
AI Insights	<input checked="" type="checkbox"/> Automated	Manual analysis
Templates	<input checked="" type="checkbox"/> Pre-built	Build from scratch
Collaboration	<input checked="" type="checkbox"/> Real-time	Limited/None
Advanced Charts	<input checked="" type="checkbox"/> 8+ types	Basic charts only
Export Formats	<input checked="" type="checkbox"/> PDF/PPT/PNG	PDF only
Setup Time	<input checked="" type="checkbox"/> < 5 minutes	Hours of configuration

Getting Started

Quick Start (5 minutes)

1. Visit [DataViz Pro](#)
2. Sign up with Google
3. Upload your CSV file
4. Select chart type
5. Export or share

For Teams

1. Create workspace
2. Invite team members
3. Set permissions (Admin/Editor/Viewer)
4. Collaborate in real-time
5. Track activity and changes

For Enterprises

1. White-label customization
 2. Custom domain setup
 3. Advanced security features
 4. Dedicated support
 5. API access
